Why True Colors?

True Colors' mission is to foster healthy, productive relationships and organizations whose successes flow from the strengths and talents of each person.

The True Colors Education Division offers life-enhancing programs that positively impact individuals within and beyond their campus community.

3 Ways True Colors is Different

- 1) We are the original, user-friendly "colors" temperament and personality typing program.
- 2) True Colors' methodology is designed to work with your entire organization not just your leadership.
- 3) Our online and in-person programming builds organizational cultures where everyone feels empowered, engaged, and valued.

What They're Saying

True Colors participants gain the language needed to have more productive dialogue. We teach teams dialogic technique and then how to utilize True Colors to have that productive dialogue.

~ Valerie Holmes | Assistant Vice President for Student Affairs, Prairie View A&M University

The True Colors Personal Awareness & Success training prompted us to be more self-aware in our communications and interactions. The training helped us to acknowledge the team's different personalities and how our various personality colors can benefit the team and the university.

~ Felecia Burns | Director of Accounting, University of Texas Permian Basin
